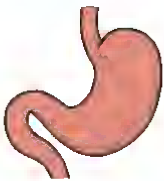
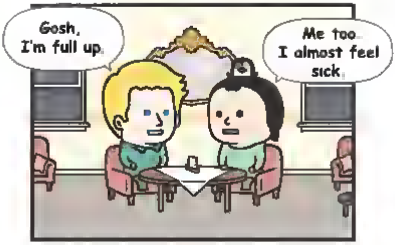
The Second Stomach

Men and women have many differences in their bodies.

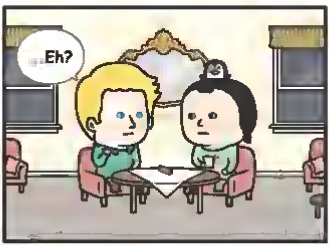
Through my observation
of years and years,
one thing that I have found is...



...that we, women,
have a second belly



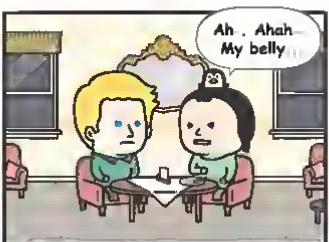
After we had a big meal.



[Already reading the dessert menu.]

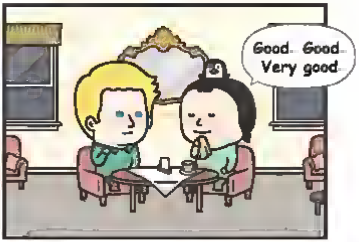
I call this a dessert belly.

Whether I'm full or not,
I like to fill this space up.

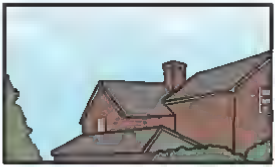


Even though I feel regret
after I finish my dessert,...

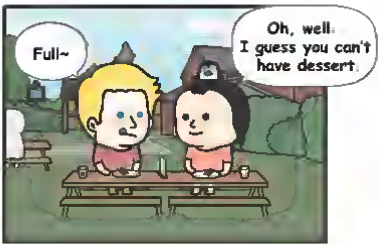
...if I can have a cup of
green tea or black caffee,...



I feel alright.



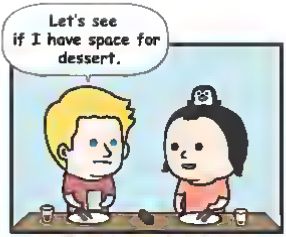
Anyway this kind of thing effects each other.



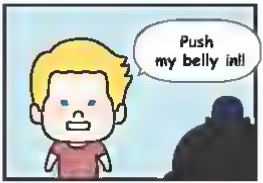
As we spent a long time together,...

I was thinking about not having dessert if you don't.
Chocolate Chip Sponge Pudding $3.25
But I'll go for this one! It looks yum.

Umm~
Hesitating



Let's see
if I have space for
dessert.



Push
my belly in!!

Push
Push

This man got a second belly too.
